

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

his conservatism in such matters is admirable, and has resulted in a solid foundation for the addition of future increments to our knowledge of South Carolina birds.—J. A. A.

Scott's Ornithology of Patagonia. Part II.—We have recently received Part II of the volume devoted to Ornithology in the Reports of the Princeton University Expeditions to Patagonia, 1896–1899,¹ issued March 3, 1910. Part I (pp. 1–112) was issued in 1904, the long interval between the publication of Parts I and II being due mainly to Mr. Scott's long continued ill health.² As part I was noticed at some length in this journal (Vol. XXII, Jan., 1905, pp. 96, 97), in which the origin and general character of the work was fully stated, it is sufficient to say that Part II conforms to the standard established in Part I, and deals with the families Procellariidæ, Laridæ, Stercorariidæ, Chionididæ, Thinocorythidæ, and Charadriidæ" (= Hæmatopodidæ, Aphrizidæ, Charadriidæ, Scolopacidæ). The nomenclature and classification are naturally the same as in Sharpe's 'Handlist of Birds.' As in Part I, the bibliographic citations are very full down to about 1902, but we miss references to the reports of the later Antarctic expeditions, as the Scotch, French, German and Swedish, published from about 1904 to 1908, and to Godman's recent 'Monograph of the Petrels.' References are made, however, to a few important works and papers published as late as 1909, and others in 1907.

The illustrations are mainly text figures of heads, feet, wings, tails, etc., but comprise about a dozen full-length figures, drawn by H. Grönvold, and mostly printed as uncolored full-page plates, numbered consecutively with the text illustrations as figures.

The work forms an exceedingly useful compendium of Patagonian ornithology, and we hope that the manuscript was left by the author in such shape that its completion will be only a matter of time.—J. A. A.

A Biography of William MacGillivray.³—The personality of William MacGillivray is of special interest to American ornithologists through his
